

Online Shop Package

\$750 per year

The MyWork Australia Online Shop Package is a complete ecommerce system perfect for any business or individual looking to sell their products or services online. Although a vital part of any modern business, the development of an Online Shop has been largely considered an unachievable goal due to the outrageously high initial development costs imposed by other web design companies. Our industry changing annual fee structure allows for any business to dramatically expand their customer base by selling their products to not just their local neighbourhood, but the entire world via the power and reach of the internet.

Freedom to Grow

With literally no restrictions on the number of products, categories, photos or pages, you are free to continuously add to your Online Shop whenever you desire.

Fully Automated

From real-time order and shipping calculations to the processing of instant payments, everything inside the Online Shop system is fully automated.

Safe and Secure

Industry leading Secure Socket Layer (SSL) certificate integration ensures any private customer data is fully encrypted and safe.

Payment Gateways

From Paypal to more advanced Payment Gateways offered by leading Australian banks, the Online Shop system is compatible with all major payment processing systems.

User Friendly

The user friendly Content Management System (CMS) is designed to allow even those with the most basic of computer skills to be able to update their Online Shop with ease.

Complete Package

All Online Shop systems come complete with a professional design, hosting, domain name registration, unlimited emails, support and Content Management System (CMS) access.
